

A Tesla in the Street

- V1: Our friends have gone electric, and caught the 80's beat
They were feeling like a Numan, now there's a Tesla in the street
- V2: We've been conditioned on low emissions, so tired, dead on my feet
Don't you know you'll never get exhausted, with a Tesla in the street.
- V3: Let cable take the strain, 'til you batteries are replete
Been doing too much, guilty as charged, now there's a Tesla in the street
- V4: It would grace anyone's driveway, whether tarmac or concrete
Not a hydrocarbon footprint, but a Tesla in the street
- V5: I've confused mi amperes and mi Voltaires, I'm confused, I need a seat
To understand this current Enlightenment, you'll need a Tesla in the street.
- V6: I don't get the fuss, just get a bus, there's loads of folk that you might meet
But you drive alone, from ohm to home, with a Tesla in the street.
- V7: Diesel's dead you petrol head, this earth can't take the heat
Resistance is futile, so glide in style, in your Tesla, in the street
